🎓 Data Science Student | Aspiring Data Scientist

PROFILE

I am a motivated Data Science student with a strong passion for using data to solve real-world problems. I have a growing foundation in statistics, programming, and data analysis, and I am continuously developing my skills in machine learning, data visualization, and predictive modeling. I enjoy working with datasets, cleaning and processing data, and extracting meaningful insights that support better decision-making. I am highly motivated to learn new technologies and I work well both independently and in team environments.

EDUCATION

2023 – Present (University – Bachelor degree in data science (3 year student))

During my studies, I have gained knowledge in programming fundamentals, probability, statistics, and data handling techniques. I have also started learning Python programming and Excel for data analysis and visualization.

TECHNICAL SKILLS

Python (Pandas, NumPy – beginner level)

Data Cleaning and Preprocessing

Data Visualization (Matplotlib, Excel charts)

SQL (basic queries and database management)

Microsoft Excel for Data Analysis

Basic Machine Learning concepts

Statistical Analysis (mean, median, variance, correlation)

PROJECTS

I have worked on several learning-based projects in data science, including:

Sales Data Analysis using Excel and Python to identify trends and insights

Student Performance Dataset analysis to understand academic patterns

Basic data dashboard creation for visualizing key metrics

Personal Data Science Portfolio Website development

These projects have helped me understand how data can be used in real-world decision-making and problem-solving.

ACHIEVEMENTS

Learned and applied Python in small data analysis projects

Participated in group data analysis projects at university level

Developed strong interest in machine learning and artificial intelligence

Demonstrated ability to quickly understand and analyze datasets

CERTIFICATIONS / CREDENTIALS

Introduction to Data Science (self-learning / online course)

Basic Python Programming Certificate

Microsoft Excel for Data Analysis Training

CAREER OBJECTIVE

My career goal is to become a professional Data Scientist capable of collecting, analyzing, and interpreting data to support decision-making in businesses, organizations, and government institutions. I am also interested in advancing my knowledge in machine learning, artificial intelligence, and big data technologies.

LANGUAGES

Swahili – Fluent

English – Intermediate
